

Federal Regulatory Affairs Specialist

Neudorff North America is looking for a federal regulatory affairs specialist to obtain and maintain EPA registrations of biopesticides, organic and reduced risk pesticides.

Responsible for coordinating with R&D on data development, and coordinating all product chemistry and toxicology data.

Responsible for preparing all aspects of new EPA registrations, and assisting with PMRA registration documents.

Assist in coordinating data development for global regulatory use, and advise on current and proposed regulatory requirements in the US.

Education required: BSc

Location: any US state (fully remote position); occasional travel may be required.

Please send applications and enquiries to anda@neudorff.ca
